VOLGA/1 - CV GROUND MOUNT
UNDERWATER SPOTLIGHTS

VOLGA is a family of robust marine grade stainless steel luminaires suitable for underwater and ground and well recessed mounting. It utilizes high power LED in available with different color temperatures. The high quality optical lenses offering beams from ultra-narrow to wide and asymmetric light distributions. VOLGA is a perfect choice to illuminate swimming pools, decorative pools and fountains and narrow columns. The luminaire is supplied with pre-wired cable, anti-humidity kit and is fully sealed from the factory. The underwater version must be operated submersed in water at all time in order to prevent over-heating of the luminaire. VOLGA inground and wall recessed is suitable for in air operation. The marine grade 316 stainless steel body guarantees corrosion free appearance throughout the lifetime. We highly recommend that the luminaire lay out should be considered during specifying and planning processes. Installation work must be carried out under national safety regulations.
